

CATÁLOGO CORES RAL

Sistema K7

PARTTEAM®

Sistema K7 RAL Colors

Os quiosques podem ser produzidos em inox, aço lacado ou MDF lacado em qualquer cor RAL.

O sistema RAL K7, com 180 cores, é menor que o NCS, porém representa cores padronizadas em muitos materiais, equipamentos e marcas existentes no mercado, nomeadamente nos quiosques multimédia PARTTEAM.

Existem vários catálogos de cores RAL, mas o mais usado em Portugal é o K7 que apresenta um acabamento **brilhante**.

NOTA: Outras cores RAL de outros sistemas podem ser utilizadas a pedido.

ATENÇÃO: As cores RAL visualizadas no seu monitor apresentam diferenças relativamente ao catálogo original de cores RAL. Isto poderá dever-se, por exemplo, à calibragem do monitor do seu computador, (brilho, contraste, etc.).

Consulte sempre um catálogo original RAL numa loja especializada.
